A STRUCTURED NETWORK

You can access our fibre-optic/CAT5-7 interconnected network throughout the hotel and the Estrel Congress Center. Each of the independent network segments is housed in climate-controlled wiring closets and can be connected at will. The rooms are secured with a keycard access system, ensuring you a high level of data and access security. You also have the option of installing a network with your own equipment.

INTERNET CONNECTION

Two broadband connections of renowned Internet providers feature bandwidth to 1 Gbit/s guaranteeing you connectivity to meet all your online needs. You can choose between automatic addressing (DHCP) or static IP addresses.

WI-FI

All of our event rooms are equipped with Wi-Fi internet access to current standards and can be set up for individual or multi-user access as needed.

ACTIVE NETWORK COMPONENTS

Upon request, we can use a variety of virtual networks (VLAN) on our site to construct a data transmission connection for you with Gigabit speed. This allows you to keep participants in your event updated around the clock with the latest data at different locations throughout the premises.

SERVICES

Information technologies (IT) play a decisive role in event management today. Estrel Berlin is always on call to provide you with IT advices and services you need. Our internal IT department has years of experience supporting our clients.

In addition to telephones, you can also hire other IT tools from us including network equipment, complete computer work stations and high-performance colour copiers. Simply contact us via phone +49 30 6831 22566 or send an e-mail to estrelcc@estrel.com to request an offer tailored to meet your requirements.
